TO WHOM SO IT MAY CONCERN

Hon. Attorney General,

The Microsoft lawsuit should settle as soon as possible. I understand that management harmed Netscape but that corporation was sold at premium. Now in future we should have better government oversight that nor microsoft or any large corporation harmed emerging corpoation, or individual enterprenurship in this country which is good for the country. At the sametime this country is becoming litigatig society which harms corpoation like Microsoft, Physicians, Consulting firms or any small or large business that harms the nation. We are producing more attornys at the cost of innovation, enterprenurship, small and large businesses and scientist and technologist. this litigating society will be the downfall of U.S. A . Therefore, settelment is the best interest for the country and we can progress.

Sincerely,

NAYAN DALAL.
